[^0]:    2PBA Bent Axis Piston Pump, Fixed Displacement, 350 @ 400 bar.

[^1]:    Horsepower for driving a pump : For every 1 hp of drive, the equivalent of $1 \mathrm{gpm} @ 1500 \mathrm{psi}$ can be produced.
    Horsepower for idling a pump : To idle a pump when it is unloaded will require about $5 \%$ of it's full rated power
    Wattage for heating hydraulic oil : Each watt will raise the temperature of 1 gallon of oil by $1^{\circ} \mathrm{F}$. per hour.
    Flow velocity in hydraulic lines : Pump suction lines 2 to 4 feet per second, pressure lines up to $500 \mathrm{psi}-10$ to 15 ft ./sec., pressure lines 500 to $3000 \mathrm{psi}-15$ to 20 ft ./sec.; all oil lines in air-over-oil systems; 4 ft ./sec.
